SPRINT PLANNING MEETING 4

SPRINT GOAL

The main purpose of this sprint is to ensure that user can send and receive messages and user can review on bought products. This will be completed by using Flutter.

SPRINT BACKLOG

USER STORIES:

1. As a user I want to be able to review a product or service that I have previously bought so that I can give feedback.

TASKS:

- Design UI for Review system.
- Record the review into database.
- Create php to calculate average.

ACCEPTANCE CRITERIA:

- Given that user has purchased an item then they are able to review the item.
- Given that the user has not purchased item, then the Review system does not appear on items that user did not buy
- Given that an item has been purchased by at most 3 users, then the system shall calculate average review for the product.

2. As a user, I want the ability to be able to remove from the cart so that I can remove items I do not want to purchase.

TASKS:

- Add the delete icon on items on cart
- Code to remove the deleted item on cart

ACCEPTANCE CRITERIA:

- Given that a user has added an item on cart, the user can be able to delete item from cart.
- Given that there are items on the cart, all items should have the delete icon.

3. As a user, I want to be able to send a message to seller or buyer so that I can be able to ask questions or respond to a buyer.

TASKS:

- Design UI for messages
- Record messages.

ACCEPTANCE CRITERIA:

- Given that the user is a buyer when want to send a feedback message or a question about an item, then they should be able to send message to seller.

- Given that the user is a seller, when they want to respond to the buyers message, then they should be able to send a message back to them.

4. As a user, I want to be able to receive a messages so that I can be able to see a message sent to me.

TASKS:
- Display message received
- Record the received messages.

ACCEPTANCE CRITERIA:

- Given that the user is a buyer, when a seller has sent them a response, then the buyer should have received a message.
- Given that the user is the seller, then they should be able to receive messages from buyer when buyer sends them a message.

5. As a user, I would like to be able to be asked to accept cookies so that the website can personalize, and save information about session.

TASKS:

- Add option to accept cookies.
- Add option to not accept cookies.
- Able to save information.

ACCEPTANCE CRITERIA:

- Given that a user wants their information saved, then the website should allow user to accept cookies.
- Given that a user does not want their information saves, then the website should allow user to deny cookies.
- Given that the user has accepted cookies when option was given for cookies, then the website shall save their information and allow to personalize.
- Given that the user has not accepted cookies when option was given for cookies, then the website shall not save their information and not allow to personalize.
